

# Creating a Display

Download the display element files:

- Title.pdf
- Speakers.pdf
- Headers\_and\_words.pdf
- Display2.pdf

From each file, choose the elements you wish to use in the display

Print copies of the elements you choose. You may have to experiment with printing various elements in smaller or larger sizes. Most printers will let you print in different sizes—usually a percentage figure. All of the display files are formatted for standard 8.5 x 11 copy paper.

Arrange pieces on the display

A sample display layout is shown on the next page. You may use it as a guide or create your own arrangement.

A few tips:

- If you do not wish to print the border elements provided, consider using a manufactured border. These may be found in many arts and crafts stores, stores that sell educational materials, and office supply stores. Find a border that complements the colors in the display elements.
- You may wish to use colored construction paper or scrapbooking paper as a background for some elements. Most elements have white backgrounds and a contrasting color may help them “stand out.”
- Add your own DIAKONIA photos to the display (I’m hoping that I can add some photos to the files).

If you have any questions or would like to suggest new elements to add to these files, please contact me:
